There is a place on earth where every day, on average, over 2,700 people had to flee their homes. There is a country in which half of all children are stunted. Do you know these places? If the answer is “no”, you are not alone.

Yet telling the world about people who are facing their darkest hours is more important than ever.

CARE produced this report to highlight those crises that, though large, have gotten so little attention. “Suffering In Silence” is a call for the global community to help and to advocate for people in crises who are otherwise forgotten.
